

PRODUCT:

# POISON OAK & IVY BLOCK

POISON OAK & IVY BLOCK

# 40203

THE BASICS:

- POISON OAK & IVY BLOCK lotion has been clinically tested, and proven very effective against poison ivy, poison oak, and poison sumac rash when applied prior to exposure.
- An allergic reaction to Urushiol Oil (pronounced oo-roo-she-all) from poisonous plants will result in the following symptoms: You notice an itch between your fingers and you scratch. A little later you notice a rash, like a line running up your arm. It may resemble insect bites. This redness and swelling may be followed by blisters and severe itching. In a few days the blisters will become crusted and begin to scale. They can last 10 to 12 days and produce severe discomfort. The good news is that now there's POISON OAK & IVY BLOCK lotion.
- Our lotion has been thoroughly tested in leading dermatology clinics that specialize in contact dermatitis. Clinical tests have proven that POISON OAK & IVY BLOCK lotion is safe, effective, and works against poison ivy, poison oak, and poison sumac.
- POISON OAK & IVY BLOCK lotion formula blocks the source of the itching and rash caused by poison ivy, oak and sumac. Our "Professional Barrier System" includes POISON OAK & IVY BLOCK (40203) **to protect**, POISON OAK & IVY CLEANSER (40201) [also available in a towelette (40204)] **to cleanse** and CortiCool (40202) **to relieve**. Rainbow's barrier lotion is accepted in First Aid Kits by many power and telephone companies, public utilities and other outdoor workers.

APPLICATIONS:

POISON OAK & IVY BLOCK lotion is an easy to use non-prescription, pre-contact lotion. You apply it like sunscreen to all exposed skin and it dries quickly. Remove lotion with soap and running water after the risk of exposure has ended.

*Read and follow the label directions.*
