

PRODUCT:

# MICE & RAT BAIT

MICE & RAT BAIT

# 4025

## THE BASICS:

- **Rodents** mean trouble for the Utility and Telco industries. They **chew on wiring and cable, they attract snakes and they spread disease.** MICE & RAT BAIT has proven effective in controlling rodents in thousands of utility closures.
- **This product is easy-to-use.** Just place one or two UNopened 4 oz bags of MICE & RAT BAIT in the infested area and the rodents will do the rest.
- MICE & RAT BAIT is fish flavored to make it appealing to rodents. It is a multiple-feeding product that rodents will return to eat several times. **They gnaw the package open, eat the bait and even carry nuggets back to their nests to feed other rodents.**
- The unique formulation of MICE & RAT BAIT **does not cause a secondary poisoning effect,** should wildlife or a domestic animal eat a dead rodent.
- **Because deer mice are know to carry Hantavirus, using MICE & RAT BAIT reduces the likelihood of utility workers coming in contact with this deadly disease.** Rodents are also a food source for snakes. Eliminating rodents lowers the possibility of snakes in equipment enclosures.

\*Not for sale in California.

## APPLICATIONS:

Use MICE & RAT BAIT indoors or outdoors to control rodents in and around:

- Buried Cable
- Cross-Connect Boxes
- Offices
- Pedestals
- Switchgear
