SPRAKIL S-5 BRUSH CONTROL GRANULES

This extremely powerful herbicide should be used only where you want to totally eliminate brush, trees, and other woody plants. SPRAKIL S-5 BRUSH CONTROL GRANULES will clear vegetation from areas such as utility substations, railroad right-of-ways, firebreaks, and fence rows. Additional site application suggestions are on the label.

SPRAKIL S-5 contains 5.0% Tebuthiuron formulation on a dry granulated limestone carrier. It kills vegetation by absorption through the plant root system.

When applied to the soil, no other root-bearing plants will grow in that area for one or more seasons. SPRAKIL S-5 is considered a “bare ground” herbicide.

The duration of non-productivity is dependent upon rainfall, soil type, and other conditions. The dry granular formula of SPRAKIL S-5 makes it easy to use. Just broadcast the granules in the area to be cleared of vegetation. Rate of application 60 lb - 80 lb per acre.

Applications made early in the season have been found to give results superior to applications at a later seasonal date. May be applied at any time of the year except when ground is frozen.

APPLICATIONS:

Use SPRAKIL S-5 BRUSH CONTROL GRANULES to eliminate root-bearing vegetation for one growing season from sites such as:

- Firebreaks
- Fence rows
- Utility substations
- Railroad right-of-ways
- Pole yards
- Storage lots
- Industrial areas
- Pad-mounted equipment
