PIC RESTORATION SPRAY

**THE BASICS:**

- **PIC RESTORATION SPRAY** provides a convenient patch for polyethylene, polypropylene, and pulp cable. It simplifies in-the-field repairs and helps eliminate cable replacement. It penetrates and seals in one application.

- The oil-curing varnish formula dries to a hard, non-permeable finish. PIC RESTORATION SPRAY extends cable life by insulating cracked, broken, or damaged insulation on wires. It re-insulates conductors to extend expected cable life.

- **PIC RESTORATION SPRAY** restores UV inhibitors, cuts trouble reports, and reduces maintenance costs. Restores integrity of damaged wire insulation.

- The high-coverage pattern of **PIC RESTORATION SPRAY** provides a thermo- and photo-oxidative barrier against further wire deterioration.

**APPLICATIONS:**

Use **PIC RESTORATION SPRAY** to repair and restore damaged or broken insulation on:

- Polyethylene
- Polypropylene
- Pulp
- Pedestal applications
- Aerial applications
