

PRODUCT:

PERMETHRIN TICK REPELLENT

PERMETHRIN TICK REPELLENT

4504

FOR CLOTHING

THE BASICS:

- PERMETHRIN TICK REPELLENT is formulated to provide up to two weeks of protection against biting insects such as ticks and mosquitoes on clothing surfaces.
- The active ingredient permethrin not only repels, but kills the ticks and mosquitoes that come in contact with treated clothing helping to prevent the spreading of deadly diseases.
- PERMETHRIN TICK REPELLENT is so effective in killing and repelling ticks and mosquitoes it is used by U.S. Military personnel in the most heavily infested conditions.
- Use PERMETHRIN TICK REPELLENT on clothing surfaces per label directions combined with Jungle Formula Insect Repellent (4501) on exposed skin surfaces to provide the ultimate protective barrier against biting, disease carrying insects.
- PERMETHRIN TICK REPELLENT is used as follows: Treat outer surfaces of each outfit, front and back for 60 seconds each and allow to dry for at least 2 hours. (A complete outfit consists of shirt, trousers, and socks). Pay particular attention to socks, trouser cuffs, and shirt cuffs. One can will treat two complete outfits. Do not retreat clothing more than once every two weeks.

APPLICATIONS:

Use PERMETHRIN TICK REPELLENT to:

- Treat clothing to prevent biting insects from spreading infectious disease even in the most heavily infested areas.

RAINBOW

FEATURES	HOW YOU BENEFIT
One application lasts two weeks offering long-term protection	No need for frequent application, most insect repellents last for only 4 - 6 hours
Repels and kills ticks and mosquitoes	Maximum protection from disease carrying insects
Heavy-duty formula	Used by the military in the most heavily infested conditions.
