## PRODUCT GUIDELINES

Never alter or modify the shell or suspension system. Always use original replacement parts. Decals/stickers are acceptable if they do not affect a hard hat's protective rating or make it difficult to find damage.

Inspect your hard hat shell and suspension on a regular basis. Check for cracks or faulty parts each time it is to be used. If you notice any sign of damage, the faulty part should be discarded and immediately replaced. Inspect the hard hat each time before use and replace immediately if there is any sign of damage.

The service life of a hard hat begins when the hard hat is put into service. Maximum service life is 5 years for the shell and 1 year for the suspension, beginning immediately upon first use. If the hard hat has received a considerable strike, it should be replaced immediately, even if there is no visible damage. Only use genuine Pyramex accessories and replacement parts that have been approved for use with this helmet.

Clean only with mild soap and lukewarm water. DO NOT USE paints, chemicals, gasoline, or similar substances on the hard hat. If these substances are applied on the shell, its impact resistance and other features could be decreased and could be dangerous for the user.

Store hard hat in a cool place out of direct sunlight. Do not store in vehicles where the interior temperature can become extreme and cause deterioration of the hard hat.
