Q-TEL 2004 C-CEMENT

Q-TEL 2004 (RTC #79374) is a quick-drying rubber based adhesive that provides superior bonding of rubber tapes and sealing tapes to polyethylene cable sheaths. It is specifically designed to provide aggressive tack and improved adhesive strength.

Features & Benefits

- Aggressive tack
- Excellent adhesion to polyethylene
- Bonds many different surfaces including rubber, plastic, fabric, foam, & metal
- Fast bond formation
- Useful as a general purpose adhesive

Storage: Shelf life is one year from date of manufacture. Store in original unopened cans below 86°F (30°C). Keep away from all direct sources of heat and ignition. Keep from freezing.

Packaging: 12, 4 oz. (118ml) cans complete with screw top and applicator dauber per case.

Technicial Highlights

Material Properties (77°F/25°C)		
Property	**Value**	**Test Method**
Color	Black	Visual
Base	Rubber	N/A
Solids	45%	CAO 7167
Solvent	Heptane	N/A
Initial Viscosity	5000 - 6000 cps	ASTM D1084
Specific Gravity	0.84	ASTM D1564
Adhesion to Polyethylene	>60psi	ASTM D816
Stress Cracking of Polyethylene	None	ASTM D1693
Note: The performance data, identified above are typical for the material, but are not intended for use as specifications due to variations in testing conditions.
