RE-GEL™ has a distinct advantage over the current splice filling compounds because there is no need for the compound to be heated to a liquid state in order to be poured into the splice or equipment. Also, there is no need to pour RE-GEL™ in stages to minimize the formation of air voids, saving several man hours per splice. With RE-GEL™, there is no measurable expansion or contraction of the material over the entire temperature operating range of the cable.

The use of RE-GEL™ in termination chambers and potheads has the distinct advantage over insulating oils in that, once the material has gelled, it will not leak out of the chamber if there is a failure of the gasket materials. Equipment maintenance is also enhanced since gasket failure will not require immediate de-energizing of the equipment to remove any remaining insulating oil, replace the gasket, and reinstall the oil. RE-GEL™ is non-flammable, therefore it is an excellent choice for termination chambers.

RE-GEL™ can be used in:

- Single Splices
- Y Splices
- Potheads
- Transition Splices
- Mining Cables and Splices
- Termination Chamber on Network Transformer
- Applications where moisture must be excluded

<thead>
<tr>
<th>FEATURES</th>
<th>HOW YOU BENEFIT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Room temperature cured</td>
<td>No heating of chemicals</td>
</tr>
<tr>
<td>Gel time 10-20 minutes</td>
<td>Save several man hours per splice</td>
</tr>
<tr>
<td>No leaking from transformer termination chambers</td>
<td>No outages and no failures</td>
</tr>
<tr>
<td>Safe to employees</td>
<td>No fumes or employee burns</td>
</tr>
<tr>
<td>Compatible with cable construction</td>
<td>No damage to paper or tape</td>
</tr>
</tbody>
</table>
Do you have a question about any Rainbow Technology product? Because we’ve been supplying the utility and telecommunications industries since 1971, our technical support team has the expertise to provide answers and solutions. Just call us at 1.800.637.6047.

**SAFETY DATA SHEET:**

This product is only for sale to and use by service personnel. SDS available on request.

**PACKAGING:**

<td>10 Gallon Kit</td>
<td>1</td>
<td>90 lbs</td>
<td>2 - 5 Gallon Pails</td>
</tr>
</tbody>
</table>

*The RE-GEL 10 Gallon kit can ONLY be installed with RE-GEL Pump (79481). RE-GEL Pump (79481) comes with 12 Static Mixers (79509). Please inquire separately about RE-GEL Pump and Static mixers.

**CAUTION:**

When using Re-Gel in termination chambers or 3 phase potheads, the chambers must be thoroughly cleaned using only Denatured Alcohol. Using any other chemicals other than Denatured Alcohol could lead to serious damages as a result.
